

Warning!

Toll fraud is committed when individuals unlawfully gain access to a customer's telecommunication system. This is a criminal offense. Currently, we do not know of any telecommunications system that is immune to this type of criminal activity. 8x8, Inc. will not accept liability for any damages, including long distance charges, which result from unauthorized and/or unlawful use. Although 8x8, Inc. has designed security features into its products and services, it is your sole responsibility to use the security features and to establish security practices within your organization, including training, security awareness, and call auditing to eliminate security risks.

NOTICE

While every effort has been made to ensure accuracy, 8x8, Inc. will not be liable for technical or editorial errors or omissions contained within this documentation. The information contained in this documentation is subject to change without notice.

This documentation may be used only in accordance with the terms of the 8x8, Inc. License Agreement.

For questions or assistance

Congratulations on becoming a Packet8 Virtual Office Subscriber!

If you ordered your Virtual Office service online **directly from Packet8**, you have already signed up for a Virtual Office service plan. All you need to do now is configure your new hosted PBX and activate your extensions. Below is an overview of this process:

1. Log into your Packet8 account at www.packet8.net.
2. Submit your PBX name
3. Submit your extension information
4. Activate extensions

If you ordered Virtual Office equipment **from a retailer**, you need to follow all the steps in this guide to select and configure the service you require.

Select and Configure

Step 1 - Go to <http://activate.packet8.net> and Enter MAC Address(es)

- a. Start here to select and configure your Packet8 Virtual Office Service Plan.
- b. Enter the **MAC** address found on the retail box and on the bottom of any of your new Packet8 adapters.

Activate Your Packet8 Device

In order to activate the Packet8 device you have already purchased, you need to enter the MAC address from the device in the field below. If you have purchased more than one device, click here to view our additional MAC address page. Can't find your MAC address?

Device's MAC Address [Work already](#)

Packet8 Home | Privacy | Terms & Conditions | Contact

Step 4 - Invoice

Example of what the MAC address looks like

The MAC address identifies which authorized partner you purchased the Virtual Office devices from and will direct you to the specific website pages for the product purchased. You will need to enter the MAC addresses for all your adapters later in the process so keep them at hand.

- c. After entering one (1) of the MAC addresses, click on the More Devices link. Additional fields will be available to enter remaining MAC addresses. Click the Continue button once all MAC addresses have been entered.

Step 2 - Order Extensions and Service

A new page will then be presented.

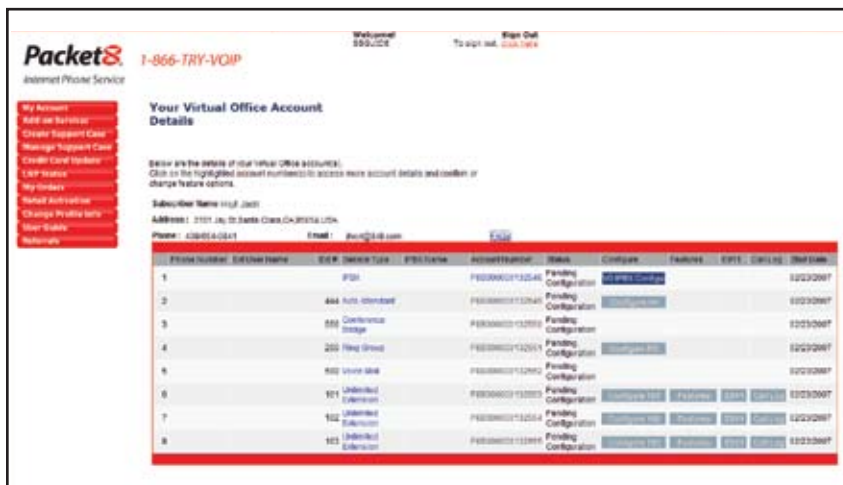

Next, you are presented an invoice page. Print and file for your records. The next step will be to configure your PBX.

Login & Configure PBX

- Login at www.packet8.net using the LOGIN NAME and PASSWORD created during the account sign-up process.
- Click on "VO IPBX Config" and assign a Company Name and Company ID. You will also need to enter Directory Listing information if you choose to be listed, select the appropriate response (YES or NO) and continue.

Step 6 - Configure Extensions

Once the PBX has been configured, the individual extensions must be configured. Click the button(s) for each extension to be configured (101, 102, 103, etc) as appropriate. The screen that follows will allow you to set up each extension's individual specifications -- first name, last name, location, etc.

The screenshot shows the Packet8 web interface for configuring an extension. The page title is "Your Packet8 Service Features". The extension number is 101. The page includes a sidebar with navigation options like "My Account", "My Orders", and "My Billing". The main content area has a "Plan" dropdown set to "Individual Extension" and a "General Call Settings" section with various checkboxes and input fields. The "First Name" and "Last Name" fields are empty. The "Forward to the number if Packet8 Network is down" field is set to "888-888-8888".

Fill out E911 addresses for all extensions.

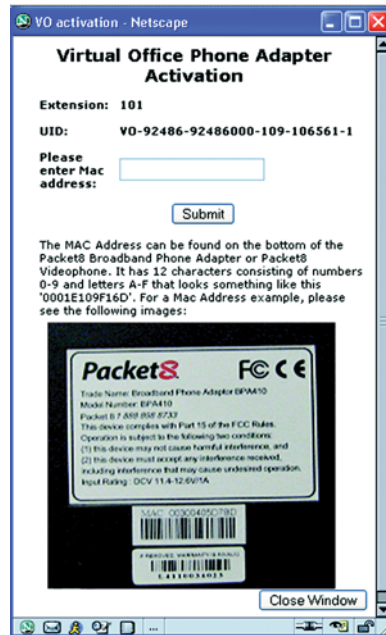

The screenshot shows the Packet8 web interface for filling out E911 address information. The page title is "Physical Address Information for Enhanced 911". The extension number is 101. The page includes a sidebar with navigation options like "My Account", "My Orders", and "My Billing". The main content area has a "Physical Address Information for Enhanced 911" section with various input fields for street address, apartment, city, state, and zip code. The "City" field is set to "California" and the "State" field is set to "CA".

Select State and Rate Center for each extension.

The screenshot shows the Packet8 web interface for selecting a state and rate center. The page title is "Pick Your New Packet8 Phone Number". The extension number is 101. The page includes a sidebar with navigation options like "My Account", "My Orders", and "My Billing". The main content area has a "Pick Your New Packet8 Phone Number" section with two dropdown menus: "Select State" and "Select Rate Center".

Step 7 - Extension Activation

Now, the final step is to activate each extension associated with your Virtual Office.

1. Assemble and connect your Packet8 Virtual Office telephone.
2. Connect your Packet8 Broadband Phone Adapter.
3. Scroll down to the Extension you wish to activate.
4. Select the "Activate" button.
5. The Virtual Office Phone Adapter Activation page will pop up.
6. Enter the MAC address found at the bottom of the adapter. Click on Submit.
7. You should now have an activated extension with telephone number.
