

# SEAWATCH 7001C-RS

## Remote Speaker for Guard Receivers

The SEA 7001C-RS is a remote speaker designed for use with any of the SEA 7001 series of guard receivers. This speaker allows the associated receiver to be monitored for watch-keeping purposes several miles away over a Telco circuit.

The 7001C-RS is designed to be monitored locally with its internal speaker. A voice-activated squelch circuit can mute the speaker when no signal is present and can be adjusted or disabled from the front panel. All circuitry is conservatively designed for continuous 24 hour, 7 day-a-week operation. The unit is designed for rack mounting.

Since 1975, SEA has been designing and manufacturing leading edge marine communication equipment known throughout the industry for engineering excellence, reliability, and ease of operation. SEA design philosophy has always been to meet or exceed all applicable specifications for all products that we manufacture.

SEA has a worldwide service network to support all of its products. This ensures back-up supply no matter where in the world your ship is operating. There has never been a better time to buy American engineering and manufacturing excellence backed by local service. For the name of the dealer nearest you, please call (425) 771-2182.

### Specifications

#### General

<b>Primary Voltage:</b> .....	115 VAC, 60HZ
<b>Current Drain:</b> .....	1.0 Amp Max
<b>Size:</b> .....	3.5" (H) x 19" (W) x 8" (D) Panel Mount
<b>Weight:</b> .....	10.7 LBS
<b>Operating Temperature:</b> .....	-20°C to +55°C
<b>Panel Controls:</b> .....	Power/Volume, Squelch, Dimmer

American technology that talks to the world.
